- Network Basic of Network Engineering
- CCNA

SKILLS

- Grate Community with people
- Great Teamwork
- Can learn with Focus
- Solving Team Problem and Giving Solutions

LANGUAGES

- English (B2)
- Japanese (N4)

PROFILE

I am Aung Khant Min, a 22 year old final year student pursuing a Bachelor's degree in Computing Science at the University of Greenwich. I am passionate about web development and enjoy building practical, user-focused digital solutions. With a solid foundation in both frontend and backend technologies, I aim to apply my academic knowledge and hands-on project experience in real-world IT environments. I am eager to further develop my technical skills, contribute to innovative web projects, and grow as a well-rounded developer.

WORK EXPERIENCE

- **Intern – Network Department**
  KMD College | 1 Month
  Permanent - It Support
  KMD College | 1 Year
  Freelance Full Stack Developer - 2 year

- Designed and developed 12 mini projects and 4 real-world applications, including a hotel management system and a library management system with user and admin functionalities.
- Built an online POS web service with full-stack capabilities, handling both admin and user interfaces.
- Developed a backend project using HTML, CSS, and core PHP, focusing on clean logic and database integration.
- Created responsive frontend designs using HTML, CSS, and Tailwind CSS for various client websites, including an e-commerce platform for camping products and a community-based food recipe site.
- Skilled in MySQL database design and management for dynamic web applications.
- Experienced in building full-stack solutions from concept to deployment, ensuring functionality, usability, and performance.

Technical Skills
- Frontend Development: HTML, CSS, Tailwind CSS, React, Responsive Design
- Backend Development: PHP (Core), C#, Kotlin (for mobile)
- Database: MySQL, Database Design and Management
- Mobile Development: Kotlin (Fitness Tracker App with admin and user sides)
- Tools & Platforms: Git, VS Code, Android Studio
- Other: Problem-solving, Team Collaboration, Project Lifecycle Understanding

Key Projects
- **Camping Products E-commerce Website:** Designed a responsive frontend using HTML and CSS.
- **Community Food Recipes Website:** Built dynamic pages with HTML, CSS, and PHP, integrating backend logic.
- **Online Clothing Store:** Developed with Tailwind CSS, HTML, and core PHP for a modern UI and server-side processing.
- **Fitness Tracker Application (Kotlin):** Created a mobile app with admin and user interfaces, focusing on data handling and app logic.
- **Hotel Management System (Full Stack):** Implemented user and admin panels with MySQL database integration.
- **Library Management System:** Built features for book borrowing, membership management, and admin controls.
